The Founder President Shri Shivaji Education Society Amravati

The threat of scarcity is ever present before our eyes, born out of a low standard of resource use economic disparities and social inequalities based on outmoded systems of management of land and utilization of human capacities.

The major problem was to increase agricultural and industrial production which would give fuller employment and higher income to the mass of the people. This however, had to be done in a manner which would not jeopardise the fundamental principles of national policy enshrined in our Constitution, namely, the creation of a society in which wealth had the means of producing it and it will be widely shared. The immediate necessity of increasing production had to be brought into alignment with the long period task of creating social transformation which would progressively reduce economic disparities and social friction and make for a better organised way of living.

Every religion is created to uplift man. Does sea water differentiate between man and man? Does the sunlight or moonlight discriminate?

Narrow mindedness in our heart sprouts and blossoms in the form of ignorance and selfishness. How can they know religion, who have come here in the name of religion wearing the garb of politics?

Only blessed one can give a message of harmony and peace. The sword, the atom-bombs will not render any solution to the present explosive situation. Rapid Development in Science and Technology has brought people from the different corners of nations close and near. Trade, economics, culture and tradition of different countries are nearing each other. In such an atmosphere helping hand to each other will have to be proved the best possible access for establishing peace in the world. I heartily pray to save this world from destructive tendencies and shower the world with understanding, co-operation to create the kingdom of peace, by propagating religion, truth and love.
